## WHO WE ARE:

Mainline Track is your only Tuff Part supplier in New Zealand for small to medium sized earthmoving machinery. We are a 100% NZ owned and operated company centrally located in Nelson.

Our Mission is to provide efficient personal service supplying quality products at competitive prices, supported by expert technical advice. Our reputation continues to strengthen due to our honesty, integrity & excellent service.

We believe that technical support and product knowledge are our company's greatest strengths. With over 40 years experience in the earthmoving industry, you can be confident that our sales staff will advise which product is best suited to your requirements so that your machine can be returned to work without delay or undue expense.

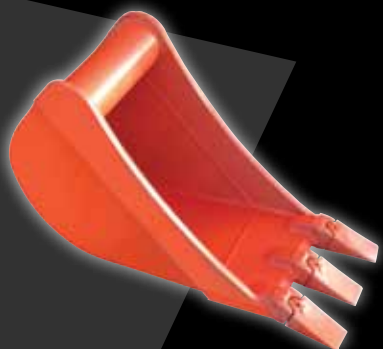

Product quality is top priority at Mainline Track. All our products are sourced from reputable companies worldwide, many of whom supply new excavator manufacturers. From our well stocked warehouse we are able to deliver anywhere in NZ, enabling our customers to have their machines ready for work with minimum delay and downtime.

Our service is our strength which is why we provide The best product, at the best price, on time, every time!

**TUFF** Part

# UNDERCARRIAGE COMPONENTS

For 1.5 - 6 Ton Machines

*Complementing our range of rubber tracks we have a wide range of Tuff-part Undercarriage Components for rubber and steel tracked excavators.*

*Manufactured using modern state of the art machinery, most of these components are available from stock or on indent.*

**TUFF** Part

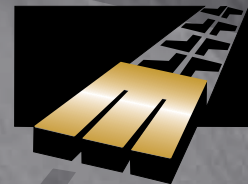

## SPROCKETS:

- >> Designed to work under the most arduous conditions
- >> Precision machined and deep hardened to give long service.

**TUFF** Part

## TRACK ROLLERS:

- >> Top and bottom rollers
- >> Manufactured from heat treated alloys for uniform hardness
- >> Lifetime lubricated with sealed assemblies.

# EXCAVATOR BUCKETS / RIPPERS

For 1.5 - 8 Ton Machines

## **TUFF** bucket

The Tuff-bucket range of Excavator Buckets have been designed and developed with the user in mind. This exclusive range are manufactured to a high specification using superior grade wear resistant steel to maximise wear life, even in the most adverse working conditions.

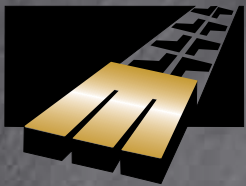

### **Special features include:-**

- >> Heavy Duty Hanger Brackets
- >> Wear Strips
- >> Hardened Steel Cutting Edges
- >> Heavy Duty Steel Sides

### **Special orders include:-**

- >> Clay Buckets
- >> Grave Digging Buckets
- >> Riddle Buckets
- >> Tele-Handler Buckets
- >> Buckets to suit dedicated Quick Hitches.
- >> Extra Heavy Duty Utility Buckets.
- >> Buckets without teeth and fitted with reversible bolt-on underblades

**In addition to standard Tuff-buckets, we can order buckets to suit customer's requirements.**

# TUFF

# RUBBER TRACKS

## TUFF

Tuff-trac Rubber Tracks have been designed and developed to meet the challenges of the most demanding applications and to provide unrivalled durability in all working conditions. Using state of the art manufacturing techniques in environmentally controlled conditions, Tuff-trac Rubber Tracks are produced to the highest standards.

Tuff-trac Rubber Tracks are manufactured using rubber compound formulas developed over many years, giving optimum anti-abrasion properties and the natural/synthetic rubber blend ensures consistent quality and superior overall performance.

Tread designs are the product of experience and testing to ensure maximum traction whilst providing reliability and durability. The forged steel drive links are inserted during manufacture to a precise pitch to ensure the smoothest running with minimal vibration. In addition to increased comfort, this results in a reduction in machine maintenance and increased traction.

Currently holding stock of over 80 sizes of track, we are well placed to service a majority of our customers requirements and together with our 'Guaranteed-to-fit' policy, you can be confident that your machine will be ready to earn without delay.

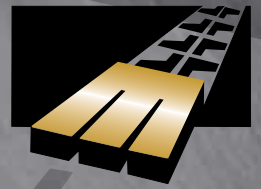

### Available to fit:-

- >> Micro - 8 Ton Excavators
- >> Tracked Dumpers
- >> Skip Loaders
- >> Powered Barrows
- >> Mini Crawler Cranes
- >> Screens and Crushers
- >> Access Platforms
- >> Stump Grinders
- >> Wood Chippers

### Features:-

- >> Available in over 80 sizes
- >> 15 Months warranty or 1000 hours
- >> Increased durability due to optimum Natural/Synthetic Rubber blend
- >> Continuous steel core band technology
- >> Guaranteed to fit policy
- >> Forged embedded metal drive links
- >> Knowledgeable and friendly sales staff

**TUFF**trac**SHORT PITCH:**

- >> Reduced noise when tracking
- >> Reduced vibration
- >> Reduced undercarriage wear
- >> Reduced pin & bush wear on machine
- >> Increased strength
- >> Increased driver comfort

*Tuff-trac Rubber Tracks have been designed and manufactured with strength and durability being of prime importance.*

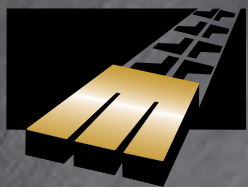

*Extensive research and development has proved that short pitch tracks constructed using continuous steel core bands ensures longer serviceability and greatly reduces the risk of de-tracking.*

**TUFF**trac**MOROOKA TRACKS:**

*The Tuff-trac Morooka track range is available on indent for most models of tracked dumpers. These tracks have been proven in NZ conditions and we have many happy customers to date.*

*Delivery times are usually 6 – 8 weeks.*

*Tuff-trac Morooka tracks come with a 6 month or 500 hour warranty.*

# TRACK IDENTIFICATION

To ensure that we deliver the correct Rubber Track for your machine, it is essential that we are provided with the correct information. Our knowledgeable sales staff are trained to guide you through the process of identification, so that you can be confident of receiving the correct size track for your machine.

**The critical information required is as follows:-**

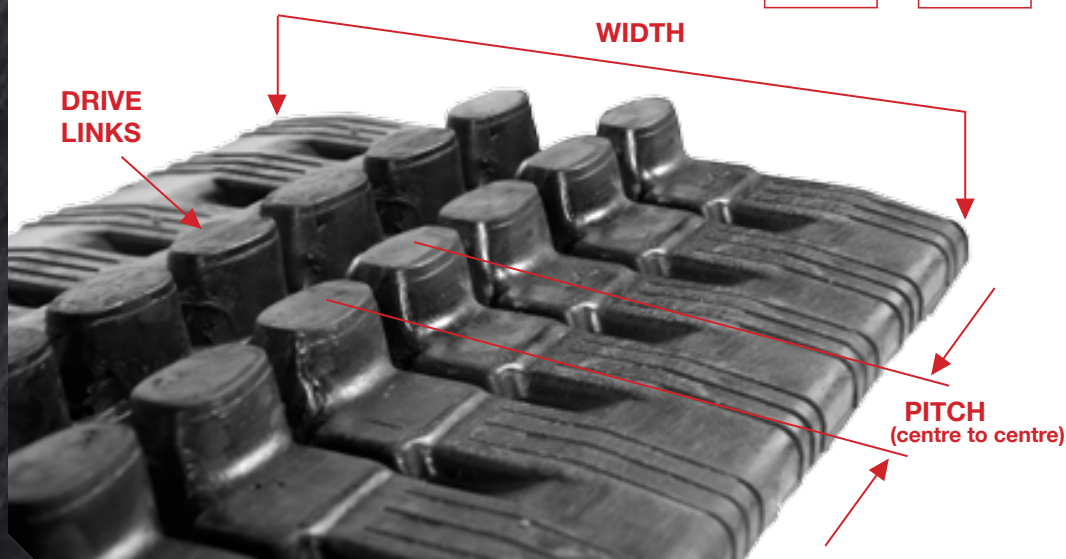

- >> Machine Make
- >> Machine Model
- >> Track Width in mm
- >> Track Pitch in mm  
(centre to centre of drive links)
- >> Number of drive links

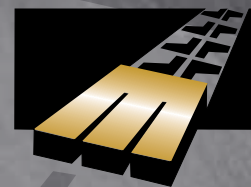

We may request additional information at times to ensure correct track is supplied.

## EXAMPLE:

WIDTH		PITCH		LINKS
300mm	X	52.5mm	X	80

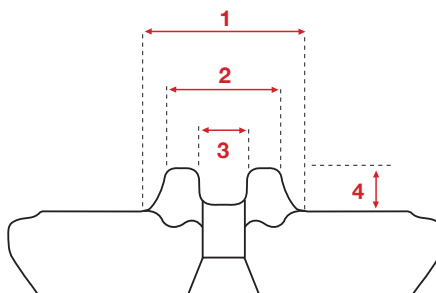

## DIMENSIONS

### RUBBER TRACKS:

FIG A.

- 1 >> Maximum outer guide width
- 2 >> Minimum outer guide width
- 3 >> Inner guide width
- 4 >> Height of link

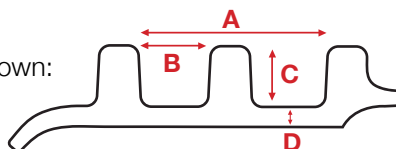

### RUBBER PADS:

For **Clip On Pads** please use dimensions as shown:

FIG B.

- 1 >> Clip on

For **Bolt On** and **City Pads** please have the dimensions as shown:

FIG C.

- 2 >> Bolt on

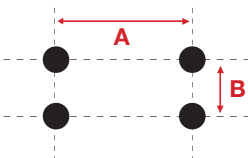

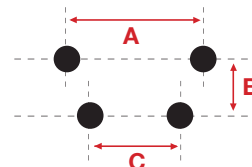

FIG D.

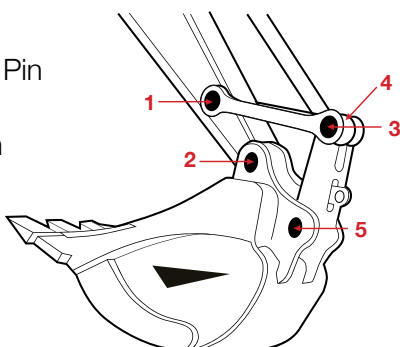

- 3 >> Chain on

### PINS & BRUSHES:

FIG E.

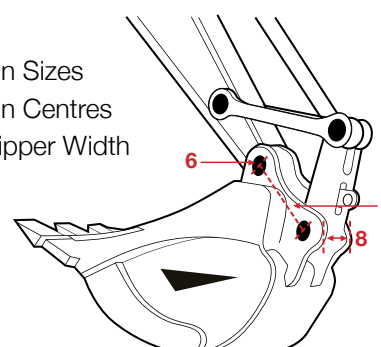

- 1 >> Crowd / Boom Pin
- 2 >> Bucket Pin
- 3 >> Crowd / Lin Pin
- 4 >> Ram Eye Bush
- 5 >> Bucket Pins

### BUCKET MEASUREMENTS:

FIG F.

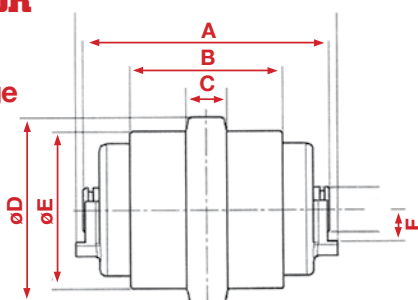

- 6 >> Pin Sizes
- 7 >> Pin Centres
- 8 >> Dipper Width

### EXCAVATOR ROLLERS:

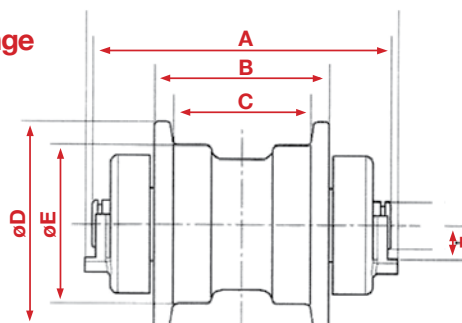

#### Centre Flange

Bolt

#### Outer Flange

Bolt
